

## **Environmental Information/Accreditation**

### **- A company commitment to 'green'**

Prime Hotels is a wholly New Zealand owned and operated company, and a subsidiary of the Prime property Group, one of Wellington's leaders in the commitment of developing green buildings. A current demonstration of this commitment is the conversion of Aorangi House, Thorndon, a \$20m development. The building design is based on the highest green 5 star rating available – a Wellington first. To find out more about Prime property Group, visit [www.primeproperty.co.nz](http://www.primeproperty.co.nz)

At both hotels we are continuously working on our environmental plan – with the goal of reducing our energy consumption in as many ways as possible.

Prime Hotels are currently going through the process of gaining a Qualmark Green Hotel accreditation and we are also in discussion with our private contractors to assess our energy consumption and waste disposal practises with a view to minimising our impact on the environment.

### **- A commitment to New Zealand business first**
