

# Environmental Policy for Comfort and Quality Hotel Wellington

## Environmental Statement

Comfort and Quality Hotel Wellington are committed to reducing the Carbon Footprint of this organisation by recycling and increasing the longevity of our resources.

## Current Initiatives

There is a copy of the organisations sustainability guide available to view at reception. This has the full list of initiatives that the hotel employs.

We have a “Green team” at the hotel that is responsible for environmental initiatives

## The future

We hope that by gradually implementing more necessary initiatives we can continue to be a forward thinking organisation with a vision based on a successful future of not only the environment but also the hotel.

Going green has become a mainstream focus for most individuals and all progressive businesses.

We hope that through these initiatives our carbon footprint reduction is so great that it can be not only good for the environment but would save money and prolong the life of the resources in this organisation. In the future we hope that we are able to brand ourselves as a green friendly organisation.

## Our environmental motto is:

“Our hotel is a home away from home; planet earth is mankind’s only home. Just like the hotel needs to be carefully maintained, so does our environment.”
