

# TWO KEY OBSERVATIONS

- Significant **technological progress** in emergency management (EM) and HA/DR
- **Complexity of EM and HA/DR** has increased even much more due to new socio-political, cultural, economic, legal and climactic conditions

# ONE PREMISE

- **UNKNOWN** Likelihood of occurrence of crises
- **UNKNOWN** Likelihood of effective courses of actions
- **UNKNOWN** Consequences of actions

# CHALLENGES & OPPORTUNITIES

Given the emergence of the **digital and sharing economy**, **powered by a Cyber-Physical world**, we need **to deploy a radically new problem-solving paradigm** for EM and HA/DR

- **WOULD IT BE:**

- A NEW NETWORK-CENTRIC CONCEPT?
- A GLOBAL PLANNING, AND LOCAL EXECUTION?

THE 'WE' ECONOMY + THE INTERNET OF 'ME'

=

OUR WORLD, *PERSONALIZED*

When *our world* is *in crisis*, we should  
seek *personalized resolutions*

*WITH COLLOBORATIVE PLANNING & INDIVIDUAL EXECUTIONS*
